

Discussion of GPLv2

What about website commitment to exiting UIUC licens

Question of non existence of SW patents in EU

A. Issue is HW patents

Intention to ask all existing contributors to relicense.

Particular problem of deceased contributors

May have to revert and reimplement

Including deriv3d code

Explanation of why contribution can cause patent problems

See Apache FAQ for more details

Explain exceptions do not modify underlying license

Request to do in the open as much as possible

Important for LLVM Foundation credibility

Suggestion for separate mailing list

But cqn't have legal discussion in open

But can we have published minutes?

Why not just become part of Apache Foundation?

Rest of Apache does not fit. E.g running EuroLLVM.

Summary :

Tell the foundation if you are still blocked.

Women in Compilers

Ideas:

Mentor network of women

Support women at conferences

Grow compilers at existing women in CS conferences

Suggestions:

Work from maths direction where women are more engaged

Want to run bias-busting sessions

Look at other orgs e.g Python Foundation
